

Online POS Software Proposal

Ideal for Import-Based Business Operations in Bangladesh

Dear Sir/Madam,

Warm greetings from Bangladesh!

We understand that your company imports products from China and distributes them across the Bangladeshi market. To help you manage your local operations more efficiently, we are pleased to offer a secure and flexible Online Point of Sale (POS) Software—perfectly suited for businesses like yours.

Our system is fully web-based and built using the Laravel PHP framework, enabling your team to access it anytime, from anywhere—whether operating from China or within Bangladesh. It simplifies inventory, sales, supplier, and customer tracking, making business management faster and more accurate.

✔ Key Features of the Online POS Software:

- ☁ Cloud-based platform: accessible globally with internet access
- 📈 Real-time sales and stock monitoring
- 🚚 Supplier and purchase management
- 👥 Customer profiles with due/credit tracking
- 📄 Comprehensive reports (daily, monthly, due reports, etc.)
- 👤 Multi-user access with role-based control
- 📱 Fully responsive for both desktop and mobile devices
- 🗣️ Fully operable in English
- 🌐 Optional Chinese interface available (add-on cost: 7,000 BDT)
- ⚙️ Includes full setup, initial data entry, and basic training

📦 Package Options:

💎 Package 1: Semi-Annual Ongoing Plan

Initial Setup Fee: **15,000 BDT** (one-time)

Semi-Annual Fee: **6,000 BDT** (every 6 months)

Our Server will be used for hosting the system.

- Includes:
- Complete installation, configuration, and online setup
 - Initial data entry for products, customers, suppliers
 - Staff training and user access setup
 - Biannual technical review and system updates
 - Priority technical support on request

💎 Package 2: One-Time Setup Only (No Ongoing Support)

Setup Fee: **70,000 BDT** (one-time)

Need to purchase your own domain/hosting server (Additional Cost Required).

- Includes:
- Online POS installation and full setup
 - Customized configuration for your business needs
 - Does not include scheduled support (available as add-on if needed)

📄 Additional Information:

- System can be customized for your business model
- Built-in data backup and cloud security included
- Remote access, support, and training provided
- Hosting can be arranged on our server or yours

We believe our Online POS Software will help modernize your operations, improve your visibility over sales and inventory, and support long-term business growth in Bangladesh. We are fully ready to start the setup process upon your confirmation.

Let's work together to build a strong digital foundation for your import business.
